

SILINX EXTREMA™ NS
power and speaker cable

■ SPECIFICATIONS

- 7 × 1.5 mm² conductors
in helical array, each with double screen,
plus 3 × overall shields
- diameter 17.5 mm
- bending radius 18 cm
- resistivity
0.0065 ohm/m
(power cable: P and N)
0.0043 ohm/m
(speaker cable: L or R)

■ CONNECTORS

■ SPADES

- fork width: 6mm, or 8mm
- electrolytic copper
- thick silver plating, gold plating (6 × flash gold)

■ Ensemble BANANAS PERFETTO™

- copper-tellurium
- thick silver plating, gold plating (three times the standard plating)
- spring loaded lamellae: copper-beryllium
- 4 mm (multiple spring loaded lamellae)
- 6 mm (1 spring loaded lamella)

- Adapter 4 mm to 6 mm
- Adapter 6 mm to 4 mm

■ MATERIAL AND ELECTRICAL QUALITIES

- very high purity copper for reliable, long term results
- extreme, multi-level shielding and screening – for very deep silence inside the cable
- optimal balance between electrical parameters – for natural sound
- very low dielectric dissipation for fast signal transmission
- no static build-up for stable performance
- topology of conductors optimized for energy transfer
- damping of micro-vibrations
- UV and microbe stability
- hard-wearing, durable, environment-friendly sleeve
- maximum continuous voltage 300V spark-tested to 1000V

■ SOUND QUALITY

- sound coming from a very deep, 'black' background
- perfectly balanced, natural sound
- smooth, natural highs; transparent balanced mids; tight, fast bass
- true-to-original rendition in 3D
- musical space full of atmosphere, air between instruments, micro information, reverberation
- razor-sharp transients
- wide dynamic range
- rhythm and pace in sync with music

SWISS PRECISION FOR THE BEST SOUND

Based on cable design experience of more than a quarter century the SILINX EXTREMA NS is the ultimate answer to the constantly growing electromagnetic pollution of our environment. While electronic circuits get more and more complex, they also become more vulnerable and sensitive to interference.

The SILINX EXTREMA NS features a unique combination of shielding, resulting in an ultra-quiet background and undisturbed performance.

Using first-class materials and terminations that match the overall quality, the SILINX EXTREMA NS reflects the synergistic approach behind all Ensemble designs.

A warranty seal expresses the Swiss precision made quality.

The SILINX EXTREMA NS provides the foundation from which music can rise and spread its wings.
